

Specification

A revised substitute specification is submitted herein to replace the substitute specification filed on April 8, 2002. The April 8, 2002 substitute contains incorrect symbols, which are corrected in the currently revised substitute specification. The revised substitute specification is identical to the originally filed specification of April 21, 2001, except for the following amendments. No new matter is added.

Please renumber the last page of the specification, i.e., the page containing the abstract, to page 74.

Please replace the abstract on page 74 with the following text:

“[ABSTRACT]

The present invention relates to clean synthetic vectors intended to facilitate and improve the insertion of one or more genes of interest into a eukaryotic cell, and notably into a plant cell. The invention also relates to a procedure for obtaining these vectors as well as transgenic plants containing them.
